One of the major works of the new American Marxism, Wright's book draws a challenging new class map of the United States and other, comparable, advanced capitalist countries today. It also discusses the various classical theories of economic crisis in the West and their relevance to the current recession, and contrasts the way in which the major political problem of bureaucracy was confronted by two great antagonists—Weber and Lenin. A concluding essay brings together the practical ones of these theoretical analyses, in an examination of the problems of left governments coming to power in capitalist states.
