Written by Jim Fusilli, the long-time rock and pop critic of The Wall Street Journal and editor and founder of ReNewMusic.net, “Catching Up” does more than introduce grownup music fans to some of the best, most dynamic and enjoyable music of the 21st century. It insists that today’s music belongs to everyone – and illustrates how that new music is suited to the tastes and passions of grownup rock and pop fans. It’s a book about faith – not only in new music, but also in the ability of veteran music lovers to appreciate and savor the best new sounds.
